The inline compact sensor **SONOFLOW® IL.52/3 V2.0** serves to detect smallest flow rates of liquids quickly. Constructed as a built-in component for machines and apparatuses, the sensor could be easily mechanically installed and electrically integrated into the control system. Due to the current, frequency and switching outputs industrial dosing applications can be supported. The RS485 interface (SONOTEC® protocol; MODBUS® via software settings) allows bus operation of up to 12 sensors in rough industrial environments. Specifically designed for the use in areas with rigorous hygiene requirements, the sensor is suitable for circulation cleaning and steam sterilization.

### General data

**SONOFLOW® IL.52/3 V2.0**  
Ultrasonic Flow Sensor for Liquids

*Viton® is a registered trademark of DuPont de Nemours, Inc.*
## Measuring Method
Ultrasound, time of flight measurement

## Measuring Cycle
Typical 20 ms (minimum 4 ms)

## Indirect Temperature Measurement
Integrated sensor at the inlet (accuracy of temperature sensor ±1 °C, with $T_{ambient}$ 23 °C and Q 1 l/min)

## Mounting
Fixed installation: 4 x recessed threaded holes M5, depth: 10 mm

## Measuring Channel
Ø 3.0 mm

## Adaptor for Tube Connection
Outer diameter 8 mm, inner diameter 4 mm

## Pressure Rating
PN10

## Material (in Contact with Fluid)
Measuring channel and measuring cell: PEEK, Seals: Viton® / FFKM

## Operating Voltage
12 ... 30 VDC, ripple max. 10 %, protection against reverse polarity (external fuse, if required: min. 200 mA)

## Current Consumption
Maximum 50 mA (with open current, frequency and switching output, depending on supply voltage)

## Electrical Connection
8-pin M12 connector, DIN EN 61076-2-101:2013

## Shielding
Required: via cable / housing (mounting screws)

## Interfaces
- Current output for flow rate: 0/4 ... 20 mA
- Frequency output for flow rate: 0 ... 20 kHz, 5 V digital
- RS485 interface: bus-capable (SONOTEC® protocol, optional MODBUS®)
- Switching output: configurable as PNP / NPN / Push-Pull, 0 ... 30 V
- Digital input (MODBus on request)

### Current Output for Flow Rate

**NOTE:** Load to GND. The max. load depends on the operating voltage:
- 12 V → 250 Ω, 15 V → 500 Ω, 24 V → 1 kΩ, 30 V → 1.2 kΩ

**RS485 interface**

- SONOTEC® protocol: Half-duplex operation / 115.200 baud / no parity / 1 stop bit / no handshaking (MODBUS® via software settings)

⚠ **NOTE:** Please find the description of the serial protocol for details (upon request).

Recommended electrical connection of the RS 485 interface

⚠ **CAUTION!** If the interface is not used, it does not necessarily has to be connected; the two pins A and B can remain open.

**RS485 Bus operation**

- The sensor supports bus operation with max. 12 subscribers. The default address is #01.

⚠ **NOTE:**
- The address can be changed by software settings (see opt. accessories).
- Permitted are addresses from #01 ... #12.
  → Menu: Identification | RS485 address

**Switching output**

- Freely configurable: e.g. adapting batch process or threshold switch of flow, maximum 100 mA
### Digital input
Freely configurable: for example for zero point calibration of flow or start dosing processes
Voltage resistant up to 30 V

![Digital input diagram]

### Protection class
IP65

### Cleaning and sterilization
Maximum liquid temperature: temporarily +145 °C; Resistant to cleaning agents (e.g. caustic soda or 3 percent nitric acid)

⚠️ **NOTE:** Verify that the sensor materials (PEEK, Viton® / FFKM) are resistant against the cleaning agent.

### Media temperature
0 ... +100 °C (T > 70 °C without voltage, temporarily +145 °C)

### Ambient temperature
0 ... +70 °C

### Storage temperature
-20 ... +70 °C

### Directives and standards
- EMC directive 2014/30/EU
- RoHS: 2011/65/EU, exception: III 7cI/ IV 15
- Acoustic emission: IEC 61157

### Maintenance
Maintenance-free

### Scope of delivery
- SONOFLOW® IL.52/3 V2.0 according to specification
- User documentation

### Optional accessories
- 8-pole M12 sensor cable, length 2 m / 5 m
- Calibration protocol
- SONOFLOW® C³ Software for testing parameter settings, to adjust sensors for a specific application and for recording measurements consisting of
  - USB Data Converter, type 013 for the connection to a computer
  - USB cable, type A-B, length 2 m
  - 8-pole M12 connecting cable, length 2 m
  - Switching power supply (12 VDC)
  - USB flash drive with SONOFLOW® C³ Software and driver for Windows
### Electrical connection
